RAKESH KODURI
Email: rakesh.mernstack@gmail.com
Mobile: 8985213626 Hyderabad

PROFESSIONAL SUMMARY:

- Software Engineer with 3 years of professional experience in software development using JavaScript, TypeScript, Python, Node.js, React.js, Vue.js, and modern web technologies.
- Expertise in backend development using NodeJS, Express.JS, Nest.JS, Django, and microservices architecture.
- Strong experience in frontend development using ReactJS, Vue.JS, Nuxt.JS, Tailwind CSS, Bootstrap, and modern UI frameworks.
- Experience in designing and optimizing PostgreSQL, MongoDB, MySQL, and Redis databases.
- Hands-on experience in developing scalable REST APIs, authentication systems, and real-time applications using Socket.io and Redis.
- Experience working with GraphQL APIs and asynchronous communication systems using GCP Pub/Sub and WebSockets.
- Familiar with cloud and DevOps technologies such as AWS, GCP, Docker, and Kubernetes.
- Experience in implementing secure authorization systems using JWT and Role-Based Access Control (RBAC).
- Strong knowledge of Data Structures & Algorithms, DBMS, Operating Systems, and Machine Learning concepts.
- Experience working in Agile methodologies with involvement in requirement analysis, development, deployment, and maintenance.
- Expertise in debugging, performance optimization, and refactoring legacy applications for maintainability and scalability.
- Quick learner with excellent problem-solving, communication, and teamwork skills.

EDUCATIONAL DETAILS:

- Completed B. Tech from Jayamukhi Institute of Technological Sciences (JNTUH) in 2024, Warangal

PROFESSIONAL EXPERIENCE:

- Working as a Software Engineer in GlobalLogic India Pvt Ltd, Hyderabad, from November 2023 to till date.

TECHNICAL SKILLS:

Programming skills	:	JavaScript, TypeScript, Python, SQL, Java, Go
Backend Technologies	:	Node.js, Express.js, NestJS, Django, Socket.io, REST APIs, GraphQL, Gin,
Frontend Technologies	:	React.js, Vue.js, Nuxt.js, Svelte, Bootstrap, Bulma CSS, Tailwind CSS
Databases	:	PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps	:	GCP, AWS, Docker, Kubernetes
Tools & Development Practices	:	Git, GitHub, GitHub Copilot, Cursor, ChatGPT, Claude, JWT, RBAC, macOS WebSockets, Linux, Windows, Design Patterns, SOLID Principles, Agile, TDD, BDD, SDD, Debugging, Performance Optimization, Code Refactoring

PROJECTS:

Froogal **May 2025 to Tilldate**

Project summary:
The platform is designed to close the data gap for multi-location businesses—ranging from regional operators to massive global enterprises—by providing them with the unified data foundation and operating tools typically used by top-tier global brands.

Technologies: NodeJS, Express.JS, Nest.JS , TypeScript, React.JS, Vue.JS, Nuxt.JS, MongoDB, Redis, Socket.io, Tailwind CSS

Roles and Responsibilities:

- Contributed to Froogal Core and Gifting Dashboards using Vue.JS and React.JS
- Improved application performance through bug fixing and code refactoring using NodeJS and Express.JS.
- Developed a real-time POS notification system using Socket.io and Redis
- Developed a Store Locator module that shows the list of stores of a particular brand using ReactJS and Bulma CSS.
- Worked on a Referral Platform, improving application performance and maintainability by identifying and fixing critical bugs, optimizing and refactoring

backend code using NodeJS, Express.JS, and Redis, while also developing and enhancing interactive dashboards using Vue.JS.
- Built Stride Delivery Partner application from scratch using NodeJS, TypeScript, TypeORM, Nest.JS, MongoDB, and Nuxt.JS.
- Participated in Agile development processes and sprint planning activities.

Luxy Ride: **Nov-2023 to Apr-2025**

Project summary:
Luxy Ride is a ride management and transportation platform designed to manage ride bookings, driver allocation, and affiliate operations. The platform supports ride-related workflows, affiliate assignment and removal, secure authorization, and calendar synchronization to help users manage scheduled trips and receive timely reminders**.**

Technologies: Node.js, Express.js, React.js, PostgreSQL, JWT, Role-Based Access Control (RBAC), REST APIs, Git, Agile Methodology.

Roles and Responsibilities:

- Developed and enhanced ride management features using Node.js, Express.js, and React.js to support ride-related operations and improve application functionality**.**
- Implemented secure authorization using JSON Web Tokens (JWT) and Role-Based Access Control (RBAC) to manage access to application features based on user roles.
- Developed features for assigning and removing affiliates from rides, supporting affiliate management within the ride management platform.
- Refactored legacy backend modules to improve code maintainability, readability, and overall application performance.
- Optimized PostgreSQL queries to improve database performance and support efficient retrieval of ride-related information.
- Implemented an Add to Calendar feature to synchronize ride details with users' calendars and automatically alert them before their scheduled trips.
- Participated in code reviews, mentored junior developers, and provided technical guidance to support code quality and maintainable development practices.
- Followed Agile development methodology throughout the project lifecycle, contributing to collaborative development and continuous improvements.

DECLARATION:
I hereby declare that all information provided above is true according to knowledge and belief.
